

# NET CANCER AWARENESS

## **FASTEST GROWING CLASS OF CANCERS**

Neuroendocrine cancer is rare, but one of the fastest growing class of cancers world-wide.

## **EVERYWHERE**

Cancer of the neuroendocrine cells, which can be found anywhere throughout the body.

## **SYMPTOMS**

The common symptoms of NET cancer include diarrhea, abdominal cramps, wheezing, pounding of the heart and a skin rash.

## **MISDIAGNOSED**

NET cancer is often misdiagnosed. The average time to diagnose it accurately is 5 - 7 years.

## **STAGE 4**

By the time most patients are diagnosed, the cancer has metastasized and is at stage 4.
