

# Unmet needs in Research and Clinical Trials on NETs

## Online survey results

NET patient leaders  
35 responses

NET patients and family  
338 responses

Healthcare professionals  
70 responses

## Each year with NETs are diagnosed

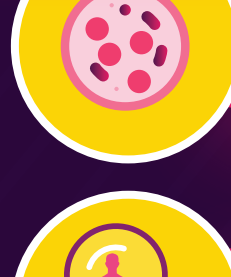

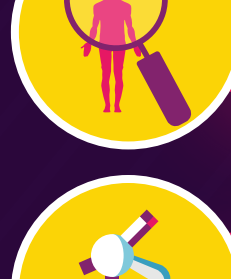

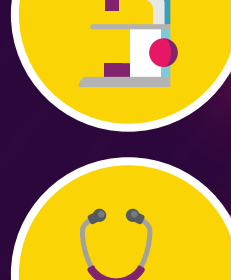

7 in 100 000 people and rising<sup>1</sup>

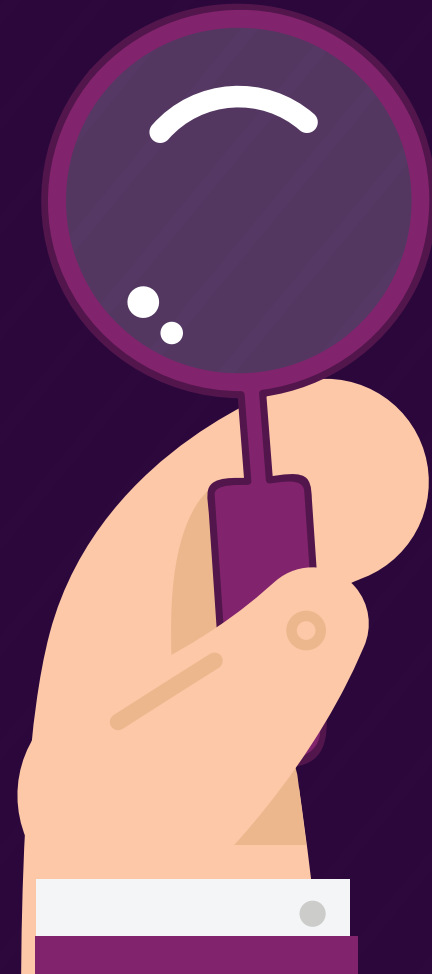

## Research needs in NETs are acute

Rising rates of this cancer mean we need more research

## Unmet needs in basic understanding of

-  what makes tumors form and grow
-  earlier diagnosis
-  translational science
-  optimal treatment sequencing
-  clinical trials

## Shared view

82% of patient leaders

57% of healthcare professionals<sup>2</sup>

patients are not involved enough in research

Patient and medical communities should support each other to ensure:

- global collaboration for clinical trials
- international data registries
- more funding from governments and industry

"If you don't suspect it you can't detect it"
